

Microsoft has increased security on downloaded files. In order to successfully use our software, you will need to do the following:

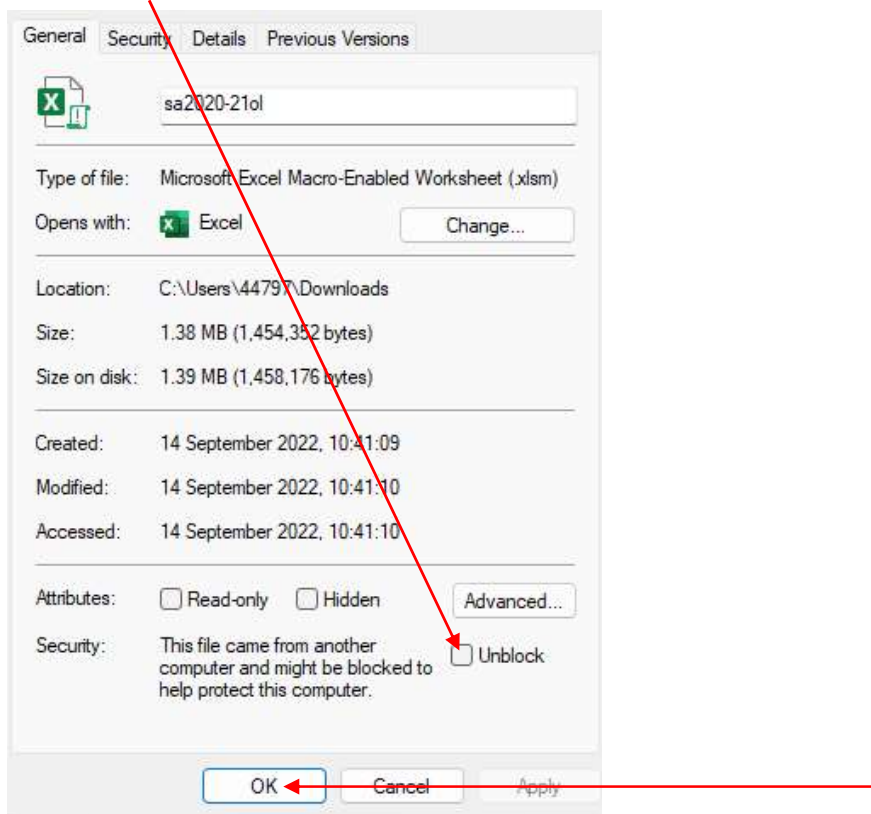

1. Using File Explorer, browse to the folder in which you saved the file; this is most commonly your Downloads folder:

2. Right click on the file and choose 'Properties'

3. On the 'General' tab at the bottom is a Security message. You need to click the 'Unblock' cell to allow the spreadsheet to open. Then choose 'OK'.

4. You will now be able to open the file – click on the yellow bar to allow the macros to run:
